

# Did you know...

## Patient safety issues in primary care are real.

Annually,

**1 in 20** outpatients experiences a diagnostic error

## Improve patient safety by engaging patients and families.

Reduce errors and improve visit efficiency by setting the visit agenda together with **Be Prepared To Be Engaged.**

Encourage safe medicine practices by **Creating a Safe Medicine List Together.**

Improve communication and health literacy through **Teach-Back.**

Support closed-loop and collaborative communication using the **Warm Handoff Plus.**
